Professional Summary

Multi-disciplinary **Data Analyst and Automation Engineer** with experience spanning software quality assurance and data science. Data Engineer with experience designing and optimizing **data pipelines, ETL workflows, and automation frameworks** in large-scale enterprise environments. Skilled in **Python, SQL, DBT, and cloud platforms (AWS, transferable to GCP)**, with strong knowledge of data quality, regulatory reporting, and analytics solutions. Currently pursuing an **MSc in Data Science and Analytics** with advanced research in **machine learning and dimensionality reduction**. Adept at working in Agile teams, translating business requirements into robust data solutions, and delivering accurate, high-quality outputs for regulatory and risk functions.

Skills

- **Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib), R (dplyr, ggplot2, caret), SQL (PostgreSQL, MySQL), Spark, SAS, MATLAB.
- **Cloud Platforms:** AWS (EC2, S3, Lambda, IAM) | Familiarity with GCP (BigQuery, Dataflow, Cloud Storage)
- **Databases & Data Engineering:** MySQL, PostgreSQL, MongoDB, ETL Pipelines, Apache Airflow, Snowflake, Data Warehousing.
- **Domain Knowledge:** Financial data systems, Credit Risk, capital/impairment reporting
- **Big Data & Cloud Platforms:** Hadoop, Apache Spark, AWS (S3, EC2, SageMaker), Azure, Google Cloud Platform (BigQuery, Cloud ML).
- **Testing & Quality Assurance:** Functional Testing, SDLC, STLC, Test Automation, Manual Testing, Selenium, JIRA, HP ALM.
- **Data Visualization:** Tableau, Looker, Power BI, Matplotlib, Seaborn, Plotly.
- **Soft Skills**: Adept, Teamwork, Good communication, Flexible, Professional, polite, and courteous communication, ability to handle high-pressure situations.

Work History

Functional Test Engineer, TDAS - Test Data Architect Solution 10/2021 to 07/2023

Amdocs Development Centre- BSSe – Pune, Maharashtra

- Designed and executed test cases using **Selenium WebDriver** with **TestNG** framework, resulting in a 40% decrease in regression testing time.
- Engineered a systematic approach to documenting **test plans, test scripts, and test execution reports**, improving accessibility and accuracy by 30%, which enhanced audit readiness and streamlined future testing cycles for continuous improvement.
- Performed backend testing by executing **MySQL** queries and **UNIX/Linux** command

for comprehensive assessment.

- Extracted and transformed data from Oracle databases using complex SQL queries, performed data cleaning and validation to ensure accuracy, and delivered sanitized datasets to clients for real-time testing and analysis.

Education

Master of **Data Science and Analytics with Advance Research** | University of Hertfordshire, Hatfield, UK | 09/2023 – 08/2025

Relevant modules include:
-Foundations of Data Science (FDS), Neural Networks and Deep Learning, Data Mining, Applied Data Science and Analytics

Dissertation/ Project: Optimizing Dimensionality Reduction using Gaussian Random Projection and Sparse Random Projection for News Category Classification.

- Researched and implemented **dimensionality reduction techniques** (Gaussian Random Projection & Sparse Random Projection) to enhance text classification efficiency on a large- scale news dataset.
- Applied **Natural Language Processing (NLP)** techniques, including **text cleaning, tokenization, TF-IDF vectorization, and feature engineering**, to preprocess and represent unstructured text data.
- Utilized **Python (Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn)** for implementation, experimentation, and visualization of results.
- Demonstrated strong knowledge of **high-dimensional data analysis, linear algebra, and probability theory** acquired during the MSc in Data Science & Analytics.

Bachelor of Technology in **Computer Science Engineering** | Siddharth Institute Engineering and Technology, Puttur, India | 08/2017 – 06/2021

Dissertation- IOT based gas leakage detection with enhanced security system and analyzing sensor data using Thing speak.

Certifications

- Successfully completed a **12-week certified course in "Internet of Things" (IoT)** from **NPTEL**, strengthening cross-domain knowledge in emerging technologies.
- Earned a **Certificate of Completion in Business Conduct Educational Process**, demonstrating commitment to corporate ethics and compliance.
- Received **AT&T Security Training Certification (2023)**, ensuring adherence to enterprise-grade security protocols in test environments.

Additional Information

- Eligible to work in the UK; open to flexible and hybrid working arrangements.
- Passionate about leveraging data science and automation to deliver scalable, high-quality solutions; committed to continuous learning and professional growth.
